

# Kimberlite®

*Value Proposition of Efficient Chemical Working*

## SAY NO TO MICROBIAL CONTAMINATION IN LEATHER

Kimberlite provides solution with upto  
100% efficiency for beamhouse operation.

## ***“Beamhouse – The Powerhouse Of Tannery”***

*In the modern era we don't use just the base chemicals for beamhouse processing, the usage of specialty chemicals has been rapidly increasing day by day. Today, raw hides and skins originating from different parts of the world may lead to great variations in the quality of the wet-blue or wet-white.*

*For efficient processing and to boost the consistency of the wet blue produced you can always rely on Tacelene Chem products for Beamhouse.*

*Kimberlite's focus is mainly on soaking process in the beamhouse operations.*

*Specialized products for control of microbial attack which directly impacts on the quality of leather product produced.*

- The risk of microbial attack is completely minimized.
- Best in quality among the products present in global market.
- Budget friendly
- Bio-Degradable
- In-Time delivery
- Already established in global market

*Kimberlite develops the products specifically for each industry/Processes as it understands the importance of the standards of the products in the process.*

*Kimberlite supports its customers with value propositions and productivity – that makes Kimberlite products unique - being major industrial processes.*
